

I am writing to oppose the expansion of LPFM stations to take priority over FM translators that broadcast stations such as AIR 1 Radio. I am a financial supporter of AIR 1 radio and feel that I would be left with a great void if I were no longer able to receive the AIR 1 signal. This is the only radio station in my area that plays current Christian music for a younger audience. If AIR 1 were to be displaced, this community is left with no positive alternative to go to. This is a radio station that supports wholesome values and has an encouraging effect on myself as well as other listeners in my area. AIR 1 also provides me with information about current events happening in the local Christian community. This radio station not only affects people by the music they play, but also by the services they provide. They provide pastors that are always available for anyone to call and talk with. This radio station is a blessing and it would be a great loss if it were no longer broadcast across the country.
